

Dead or alive! Tracing the Animation of Matter (Copenhagen, 10–11 Nov 16)

University of Copenhagen, Nov 10–11, 2016

Deadline: Apr 8, 2016

Maria Fabricius Hansen

International conference

DEAD OR ALIVE! Tracing the Animation of Matter in Art and Visual Culture

The conference will take place at The University of Copenhagen, SMK: The National Gallery of Denmark, and Louisiana Museum of Modern Art, Humlebæk.

For a full version of the call for papers please visit the website: deadoraliveconference.ku.dk

The image is an ontological paradox; it is made of dead matter, yet simultaneously appears to be alive. For millennia, artists have created images of the living world – images that are static and yet possess the power to bring to life a frozen moment in time. For as long as theories on the nature of images have existed, this duality has constituted a fundamental challenge. However, recent scholarship has rekindled interest into the question of what images do to us.

What an image is and does cannot be separated from the question what it is made of. Thus, the conference focuses on how different artistic media animate their motifs.

With the investigation of images' inherent paradox of stillness and animation, the conference aims to inspire a broad scope discussion reaching across various research areas. We invite papers that focus on specific artworks or phenomena within visual culture, with attention to the relation between image, medium, and animation, preferably informed by recent theories and thoughts within visual culture studies, Bildwissenschaft, phenomenology and other fields of image theory.

Presentations may explore questions of the life and death of the image in painting, photography, sculpture, film, objects, technology, events, performance, etc., analyzing both canonical and obscure works from in- and outside the art world, and within or across any historical periods and cultural perspectives.

Please send abstracts of 250 words for papers of 20 mins to deadoralive@hum.ku.dk by April 8, 2016.
